OSCRE has been collaborating with leading organizations for the past few months to build a new energy data standard, which is available with free and open access. These organizations represent investment firms, corporate owners, and occupiers as well as the external business partners who work with them. The reporting and compliance are both supported through raw data making reporting so much easier and more cost effective. The draft standard is now open for industry review; and we encourage your feedback by **September 25th** before the final version is published.

Let's get started.

Registration with OSCRE:

A simple registration and license acceptance step will be needed to access and view the materials. This does not obligate you to implement the standards. If you have any questions about this process, please [email us](#).

- If you have previously registered with OSCRE you will need your username and password to login.
- If you have not registered with OSCRE, please do so first, [go to the registration page](#) and follow the instructions on the page.
- If you have previously accepted an OSCRE license agreement (EULA), you do not need to accept another license agreement. Once you login you will be taken directly to the data standards landing page.
- If you have not accepted the EULA, [View the simple license for your own use of the standard](#). To learn how to accept this license follow the steps in this [short 3-minute video](#).
- There is no charge to access and use the standard for your internal purposes.

Once you are registered:

- **Landing Page:** The image below (**OSCRE Industry Data Model™**) shows what you'll find when you log into the energy data standards landing page.
- **Use Cases:** There are 5 use cases in the new energy data standard; there are links for each use case.
- [Access the details for each energy data standard using this link](#).
- **Feedback form:** We have provided a [feedback form](#) that you can use to provide your feedback. Please follow the instructions on the landing page to provide your feedback using the "Consultation Feedback Form" or email using the link provided.
- **Deadline:** Please send us your feedback no later than September 25th
- **Materials:** We encourage your review of the supporting materials. You might find the business case particularly useful both internally and with your external business partners.
- **Share:** Please share this email with colleagues in your own firm as well as others in the industry you feel would be interested in the new standard.
- **Webinar:** To help you review the standards and supporting materials, please join us for a webinar on the new standard, **September 14th from 11 AM-12 PM Eastern Time**. [Register here for the webinar](#).

The screenshot shows the top navigation bar with links for 'HACT UKHDS', 'OSCRE IDM', 'get link', and a series of version links: 'Main/WIP', 'Main/3.6rc1', 'Main/3.5', 'Main/3.4', 'Main/3.3', 'Main/3.2', 'Main/3.1', and 'Main/3.0'. The main heading is 'OSCRE Industry Data Model' with a sub-heading 'Version Main/3.6RC1 (03 Aug 2023 00:00)'. The text below states: 'This is the release candidate (draft standard) incorporating the OSCRE ESG - Energy use cases. The consultation period on this version runs from August 4th, 2023 until September 25th, 2023.' It then lists five use cases: 'Collect Energy Data From Functional Owners', 'Collect Energy Data From Supply Chain', 'Direct Emissions Policy', 'ESG Energy Data Set', and 'Energy Data Reporting Requirements Of Supply Chain'. Below this, it lists project materials: 'Implementation business case (PowerPoint)', 'Conceptual process map (Visio)', 'Conceptual process map (PDF)', 'Use case summaries', 'Implementation guidelines - energy edition (PowerPoint)', and 'Project bundle'. At the bottom, it provides instructions on how to find these materials and how to provide feedback via a consultation feedback form or email.

Thank you in advance for your consideration and your comments. Any questions about how to provide feedback, please contact us at info@oscre.org

Sincerely,

Ian
